

RQ70W Wheel Excavator

High Quality, High Efficiency

Operating Weight: 6000kg

Rated Power: 36.8kW/2200rpm

Rated Load: 450kg

Bucket Capacity: Optional

Features

YS70W is an economical wheel excavator, with the overall structural strength equivalent to the 7-ton class wheel excavator.

It is equipped with Yunnei China IV 36.8kW power system and gear pump hydraulic system.

With optimized configuration, it highlights the product economy, greatly improving the customer's return on investment.

With reliable structural strength and gear pump hydraulic system, it greatly reduces the failure rate and maintenance cost of the equipment in the later stage.

As the first choice for entry-level economical wheel excavators, YS70W has stable quality, good market reputation, and better configuration and workmanship than competitors, which is deeply favored by the majority of users.

Working Range

Item	Value
Boom Length	3200mm
Maximum Digging Reach	6454mm
Overall Width	2050mm
Overall Height	2876mm
Minimum Ground Clearance	220mm
Dozer Blade Rising / Lowering Distance	414 / 100mm
Distance from Arm Edge to Swing Center	3975mm

Technical Performance Parameters

Item	Value
Engine Power	36.8kw/2200rpm
Hydraulic Working Pressure	21Mpa
Maximum Digging Force	42kN

Gradeability	59% (30°)
Travel Speed	30km/h
Maximum Traction Force	55kN
Platform Swing Speed	10.5rpm
Fuel Tank Capacity	135L

Advantages

- Large-size cab with well-arranged controls and good vision, with small blind area.
- Excellent durability, meets China IV emission standard, with large torque and high fuel efficiency.
- Reinforced drivetrain, durable and reliable, suitable for tough road conditions.

Note

With the progress of technology, the structure, performance and parameters of the product will be improved accordingly, subject to change without notice.
